Shimmer Wall with Aluminum Composite Panels/Raleigh Convention Center, Raleigh, NC

Advanced Exterior Systems (AES) is your source for exterior wall and truss solutions. Serving the commercial and industrial building industry in the Southeast since 1977, AES designs, engineers and fabricates in our 70,000-square-foot facility.

North Hills Shopping Center, Raleigh, NC

MISSION STATEMENT:

Every member of our team is committed to long term relationships with our clients, based on safety, meeting expectations and quality. Our commitment to this mission provides an environment that encourages new ideas, focused teams, and continuous improvement.

Our High-quality products include:

PANELIZED WALL SYSTEMS

Panelized Wall Systems are prefabricated exterior wall assemblies, manufactured in a controlled environment using conventional commercial components. Exterior panels are available in a variety of finishes which include EIFS, Ceramic Tile, Stucco, Thin-Brick, and Cultured Stone or as back up for masonry products.

Advantages include:

- Substantial reduction in project schedule
- Contribute towards LEED certification
- Low maintenance
- Design flexibility
- Overall cost savings
- Quality control

TILE RAIN-SCREEN WALL SYSTEMS

Rain-screen wall systems, comprised of terra-cotta and ceramic tiles, provide innovative finishes to buildings and refurbishments.

Advantages:

- Sustainable
- Natural materials
- Tiles resist staining
- Tiles are colorfast

LIGHT GAUGE METAL TRUSSES

Advanced Exterior Systems is one of the Southeast's largest metal truss manufacturer utilizing Aegis Ultra-Span products.

Our comprehensive truss capabilities and services include:

- Design flexibility
- Light-weight non-combustible materials
- Engineering and installation services
- Specialized fabrication of dormers and cupolas
- Decking, plywood and other services available

METAL COMPOSITE PANEL SYSTEMS

Metal Composite Material panel systems give you a clean, innovative and dramatic appearance and provide maintenance-free performance to any type of structure. MCM finishes are available in copper, zinc, aluminum, stainless steel and titanium.

We are equipped with:

- In-house design and engineering departments
- CNC technology in fabrication
- Complete fabrication facilities
- 5 Engineered/tested panel systems

ARCHITECTURAL CLADDING SYSTEMS

Advanced Exterior Systems believes in accommodating the client. When needed, we move beyond the MCM Panel Systems into a myriad of other claddings for many designs.

Some examples include:

- Foam Insulated Panels
- Single-Ply Profile Metal Panel Systems
- Shimmer Walls
- Parking Deck Screens

- Equipment Screens
- Green Screens
- Specialized Soffit
- Mechanical and Decorative Louvers
- Louvers and Vents
- Flashings and associated accessories
- Sun Shades
- Custom break metal fabrication
